

26 OCT

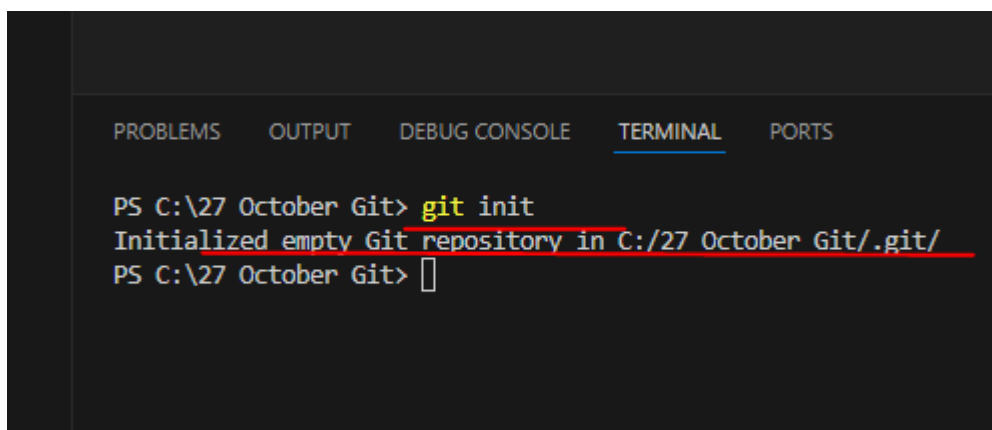

1)

2) Suppose created folder “27 October Git” and created 4 txt files story1.txt, story2.txt, story3.txt, story4.txt.

3) **git init** – creates an empty repository

4) **git add .\story1.txt** – To put file from working area to staging area

5) **git status**

```
PS C:\27 October Git> git status
On branch master

No commits yet

Changes to be committed:
  (use "git rm --cached <file>..." to unstage)
        new file:   story1.txt

Untracked files:
  (use "git add <file>..." to include in what will be committed)
        story2.txt
        story3.txt
        story4.txt

PS C:\27 October Git> 
```

6) **git add .\story2.txt**

git status

```
PS C:\27 October Git> git add .\story2.txt
PS C:\27 October Git> git status
On branch master

No commits yet

Changes to be committed:
  (use "git rm --cached <file>..." to unstage)
        new file:   story1.txt
        new file:   story2.txt

Untracked files:
  (use "git add <file>..." to include in what will be committed)
        story3.txt
        story4.txt

PS C:\27 October Git> 
```

7) **git add .** – now all files get set into staging area

git status

```
PS C:\27 October Git> git add
PS C:\27 October Git> git status
On branch master

No commits yet

Changes to be committed:
  (use "git rm --cached <file>..." to unstage)
    new file:   story1.txt
    new file:   story2.txt
    new file:   story3.txt
    new file:   story4.txt

PS C:\27 October Git> 
```

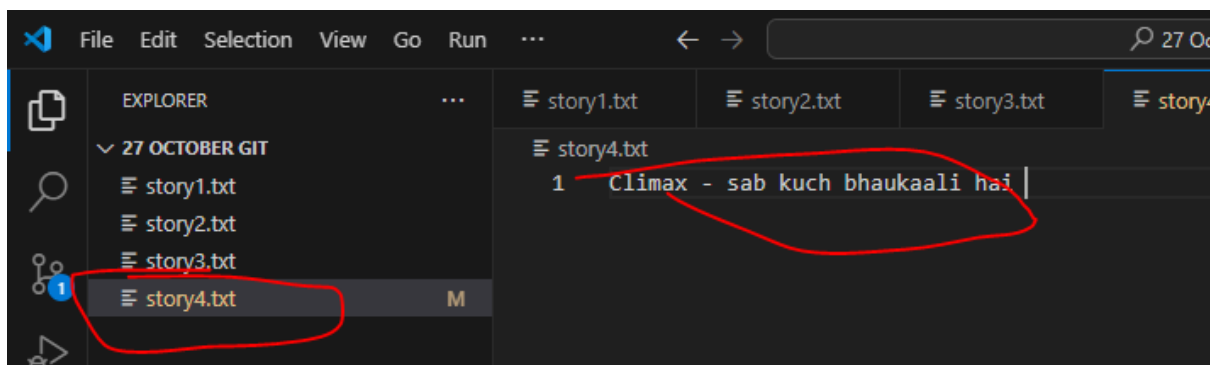

8) **git commit -m "story added"** – all files have been added into database

```
PS C:\27 October Git> git commit -m "story added"
[master (root-commit) bb2eebc] story added
4 files changed, 0 insertions(+), 0 deletions(-)
create mode 100644 story1.txt
create mode 100644 story2.txt
create mode 100644 story3.txt
create mode 100644 story4.txt
PS C:\27 October Git> 
```

9) **git status** – nothing to commit

```
PS C:\27 October Git> git status
On branch master
nothing to commit, working tree clean
PS C:\27 October Git> 
```

10) Suppose added something in story 4

11) **git status**

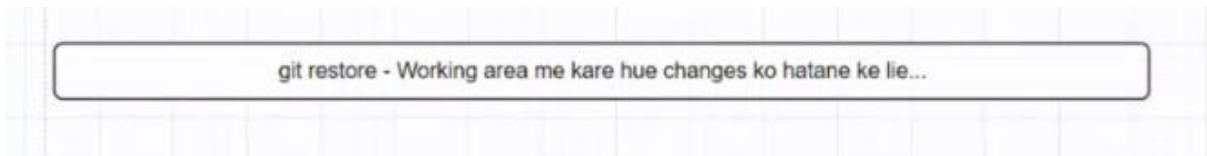

```

PS C:\27 October Git> git status
On branch master
Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
    modified:   story4.txt

no changes added to commit (use "git add" and/or "git commit -a")
PS C:\27 October Git>

```

12) **git restore** – back to previous state

13) Now if added part reached in staging area then how can we restore. So restore file from staging area to working area.

```

PS C:\27 October Git> git status
On branch master
Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
    modified:   story4.txt

no changes added to commit (use "git add" and/or "git commit -a")
PS C:\27 October Git> git add .
PS C:\27 October Git> git status
On branch master
Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
    modified:   story4.txt

PS C:\27 October Git>

```

git restore --staged story4.txt

```

PS C:\27 October Git> git restore --staged story4.txt
PS C:\27 October Git> git status
On branch master
Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
        modified:   story4.txt

no changes added to commit (use "git add" and/or "git commit -a")
PS C:\27 October Git>

```

git init - empty repo initialize karne ke lie

git add - working area se staging area me changes ko patakne ke lie

git commit - staging area ke sb changes ko ek saath commit karne ke lie..

14) added climax in story4.txt

git add .

git commit -m "added climax"

```

PS C:\27 October Git> git add .
PS C:\27 October Git> git sttatus
git: 'sttatus' is not a git command. See 'git --help'.

The most similar command is
    status
PS C:\27 October Git> git status
On branch master
Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
        modified:   story4.txt

PS C:\27 October Git> git commit -m "added climax"
[master bfc24e2] added climax
 1 file changed, 1 insertion(+)
PS C:\27 October Git> git status
On branch master
nothing to commit, working tree clean
PS C:\27 October Git>

```

15) **git log** – to see how many commits are there in committed area

```

nothing to commit, working tree clean
PS C:\27 October Git> git log
commit bfc24e2c16f45aadb18f1068ee86db2d17d1fe65 (HEAD -> master)
Author: Gauravraj Singh <er.gauravraj8052625814@gmail.com>
Date: Thu Oct 31 13:15:10 2024 +0530

    added climax

commit bb2eebc3b068c8bbfc2759f2058cade37dc28523
Author: Gauravraj Singh <er.gauravraj8052625814@gmail.com>
Date: Wed Oct 30 17:36:28 2024 +0530

    story added
PS C:\27 October Git>

```

16) `git log -p` = shows previous deleted and newly added things

```

PS C:\27 October Git> git log -p
commit bfc24e2c16f45aadb18f1068ee86db2d17d1fe65 (HEAD -> master)
Author: Gauravraj Singh <er.gauravraj8052625814@gmail.com>
Date: Thu Oct 31 13:15:10 2024 +0530

    added climax

diff --git a/story4.txt b/story4.txt
index e69de29..3bb748c 100644

TERMINAL
index 0000000..e69de29
diff --git a/story4.txt b/story4.txt
new file mode 100644
index 0000000..e69de29
PS C:\27 October Git> git checkout bfc24e2c16f45aadb18f1068ee86db2d17d1fe65
Note: switching to 'bfc24e2c16f45aadb18f1068ee86db2d17d1fe65'.

You are in 'detached HEAD' state. You can look around, make experimental
changes and commit them, and you can discard any commits you make in this
state without impacting any branches by switching back to a branch.

If you want to create a new branch to retain commits you create, you may
do so (now or later) by using -c with the switch command. Example:

git switch -c <new-branch-name>

Or undo this operation with:

git switch -

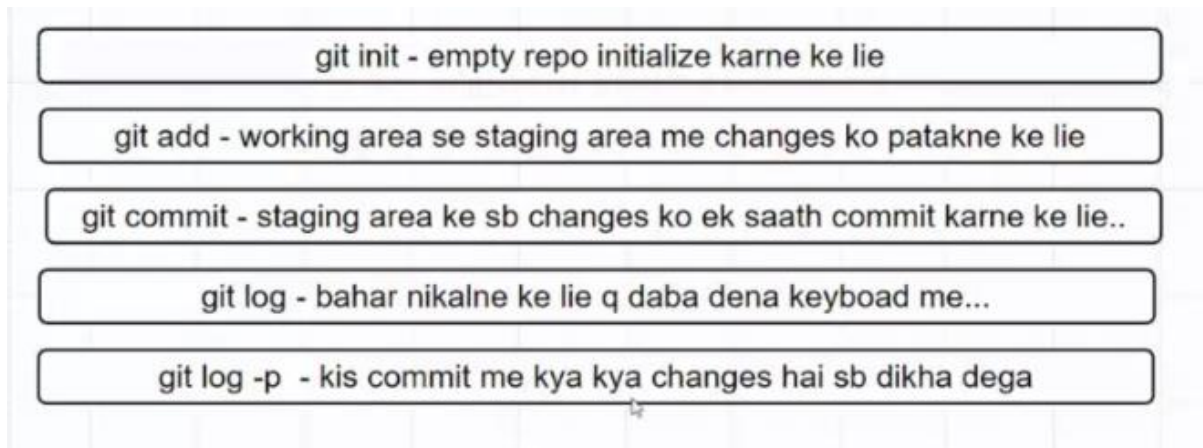

Turn off this advice by setting config variable advice.detachedHead to false

HEAD is now at bfc24e2 added climax
PS C:\27 October Git> git checkout bb2eebc3b068c8bbfc2759f2058cade37dc28523
Previous HEAD position was bfc24e2 added climax
HEAD is now at bb2eebc story added
PS C:\27 October Git>
```

git restore --staged - Staging se working area me aane ke lie....

git checkout <COMMIT_ID> - Kisi specific commit id pr jane ke lie..

18) REVISION

+++++

AGENDA –

1) Create files in vs code

```

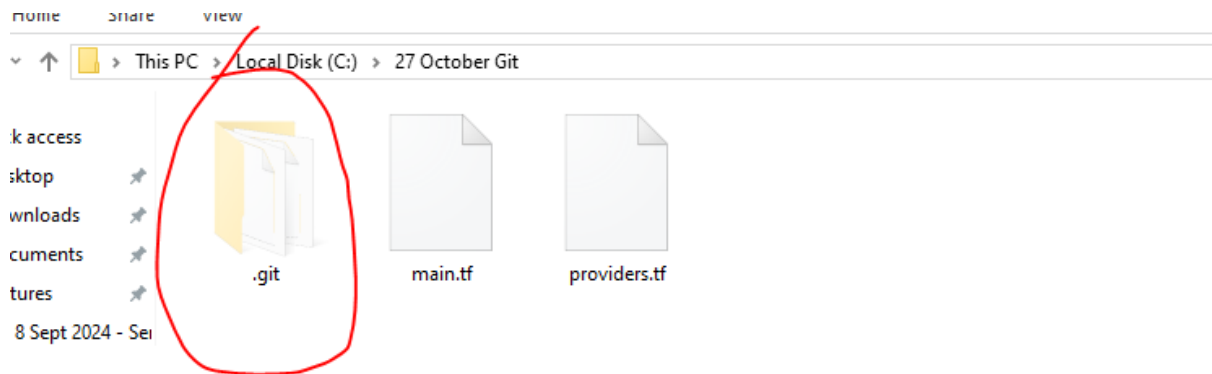

1 resource "azurerm_resource_group" "rg1" {
2   name = "rg1"
3   location = "central india"
4 }
  
```

```

1 terraform {
2   required_providers {
3     azurerm = {
4       source = "hashicorp/azurerm"
5       version = "3.113.0"
6     }
7   }
8 }
9
10 provider "azurerm" {
11   features {}
12 }
  
```

2) **git init** – Initialized empty Git repository and git folder is created

```
PS C:\27 October Git> git init
Initialized empty Git repository in C:/27 October Git/.git/
PS C:\27 October Git> 
```

3) **git add .**

git commit -m "added rg1"

```
PS C:\27 October Git> git add .
PS C:\27 October Git> git commit -m "added rg1"
[master (root-commit) 78a9117] added rg1
 2 files changed, 16 insertions(+)
 create mode 100644 main.tf
 create mode 100644 providers.tf
PS C:\27 October Git> 
```

4) **git log -p**

```

PS C:\27 October Git> git log -p
commit 78a9117b5bc1933d859403a219a3bcbddca2e2e6 (HEAD -> master)
Author: Gauravraj Singh <er.gauravraj8052625814@gmail.com>
Date: Thu Oct 31 18:31:16 2024 +0530

    added rg1

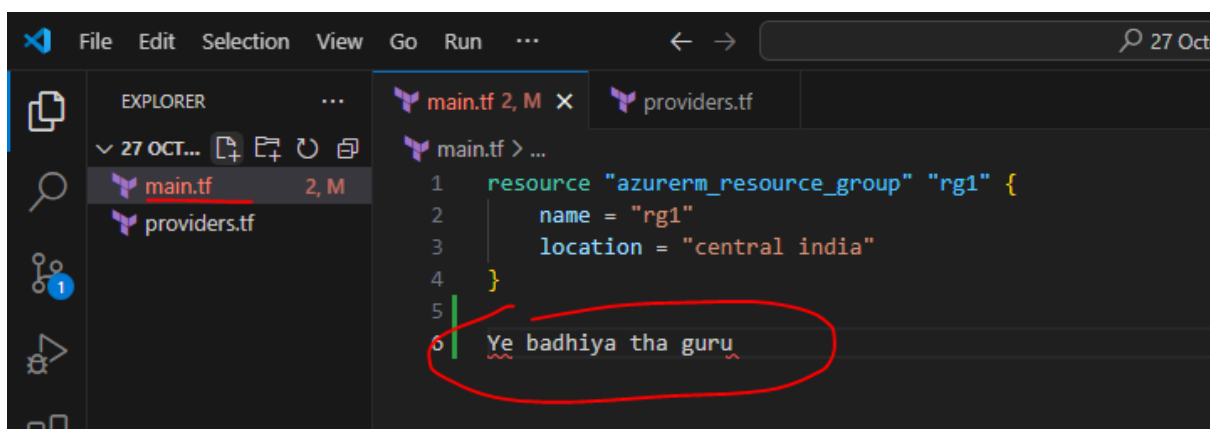

diff --git a/main.tf b/main.tf
new file mode 100644
index 0000000..371c6bf
--- /dev/null
+++ b/main.tf

commit 78a9117b5bc1933d859403a219a3bcbddca2e2e6 (HEAD -> master)
Author: Gauravraj Singh <er.gauravraj8052625814@gmail.com>
Date: Thu Oct 31 18:31:16 2024 +0530

    added rg1

diff --git a/main.tf b/main.tf
new file mode 100644

```

5) Add a line in main.tf file

6) **git add .**

git commit -m "guru added"

```
PS C:\27 October Git> git add .
PS C:\27 October Git> git commit -m "guru added"
[master 8b12ed8] guru added
1 file changed, 3 insertions(+), 1 deletion(-)
PS C:\27 October Git>
```

7) **git log** – we can see there are 2 commits

```
PS C:\27 October Git> git log
commit 8b12ed8d5ad37d0dd3d9a97628a91f9ebacfd03e (HEAD -> master)
Author: Gauravrajsingh <er.gauravraj8052625814@gmail.com>
Date: Thu Oct 31 18:36:51 2024 +0530

    guru added

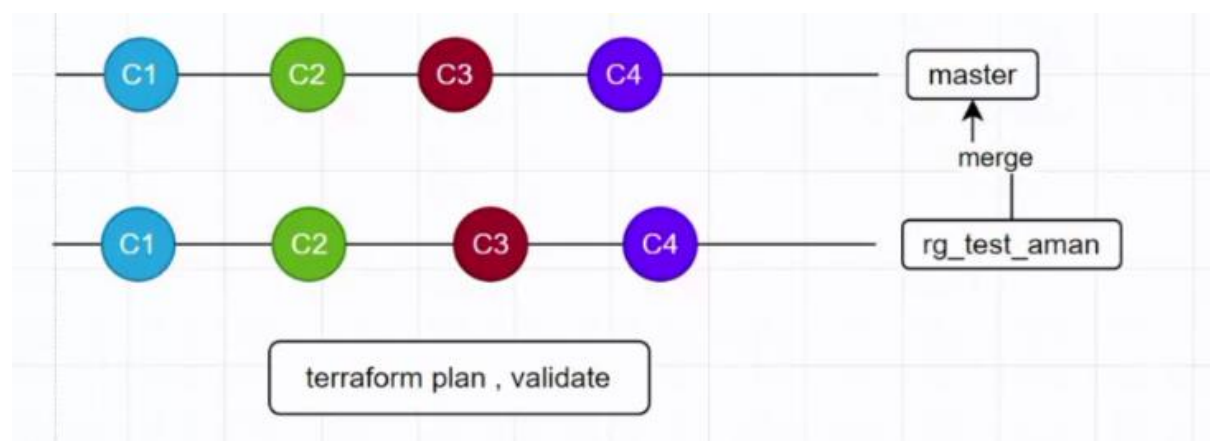

commit 78a9117b5bc1933d859403a219a3bcbddca2e2e6
Author: Gauravrajsingh <er.gauravraj8052625814@gmail.com>
Date: Thu Oct 31 18:31:16 2024 +0530

    added rg1
PS C:\27 October Git>
```

8) So both commits are inside master

+++++

AGENDA – Branch merge

1) **git branch**

git branch - aapki repo me kitni branches hai... aur aap kaun si branch pr ho? ye btata hai..

```
PS C:\27 October Git> git branch
* master
PS C:\27 October Git> 
```

2) **git branch gauravtest** – creates the branch

```
PS C:\27 October Git> git branch gauravtest
PS C:\27 October Git> 
```

3) **git branch** – shows all number of created branches

Now gauravtest branch will have same content as master branch

```
PS C:\27 October Git> git branch
gauravtest
* master
PS C:\27 October Git> 
```

4) **git branch ahsishtest** – creates the branch

```
PS C:\27 October Git> git branch ahsishtest
PS C:\27 October Git> git branch
ahsishtest
gauravtest
* master
PS C:\27 October Git> 
```

4) **git checkout <branch_name>** - to move from 1 branch to another branch

git checkout <branch_name> - ek branch se dusre branch me jane ke lie...

5) Now, Suppose we have to switch to gauravtest branch

git checkout gauravtest

```
PS C:\27 October Git> git checkout gauravtest
Switched to branch 'gauravtest'
PS C:\27 October Git> 
```

6) **git branch**

Here * green colour indicates currently in which branch we are in

```
PS C:\27 October Git> git branch
ashishtest
* gauravtest
master
PS C:\27 October Git>
0
```

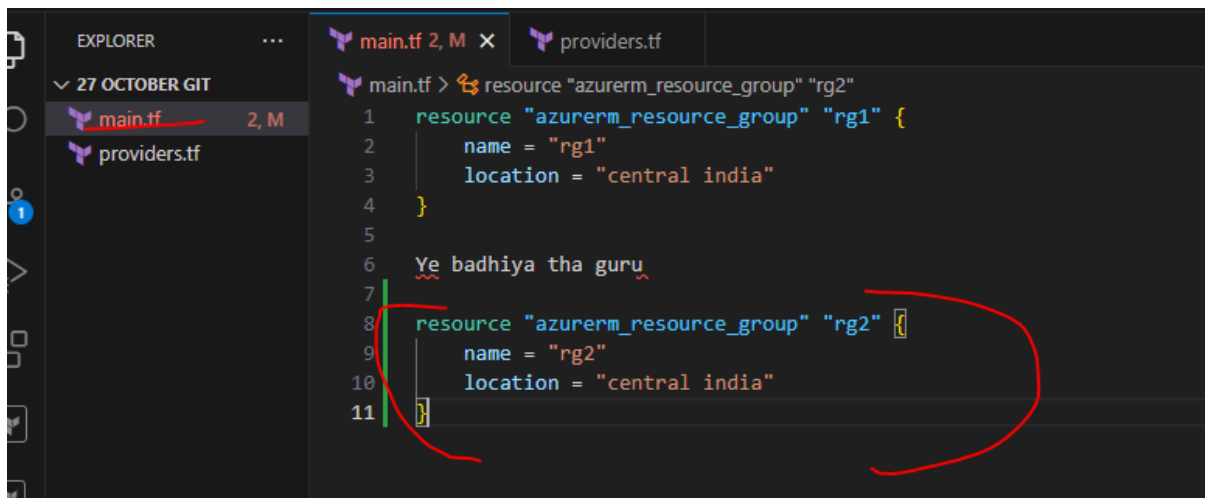

7) **git checkout -b rakhisawant** – creates as well as switched to a new branch

```
PS C:\27 October Git> git checkout -b rakhisawant
Switched to a new branch 'rakhisawant'
PS C:\27 October Git>
```

8) **git branch**

```
PS C:\27 October Git> git branch
ashishtest
gauravtest
master
* rakhisawant
PS C:\27 October Git>
```

9) After switching into that branch just add rg code in main.tf file

```
main.tf 2, M x providers.tf
main.tf > resource "azurerm_resource_group" "rg2"
1 resource "azurerm_resource_group" "rg1" {
2     name = "rg1"
3     location = "central india"
4 }
5
6 Ye badhiya tha guru
7
8 resource "azurerm_resource_group" "rg2" {
9     name = "rg2"
10    location = "central india"
11 }
```

10) **git add .**

git commit -m "rakhiadded"

```
PS C:\27 October Git> git add .
PS C:\27 October Git> git commit -m "rakhiadded"
[rakhisawant 903d2b4] rakhiadded
1 file changed, 6 insertions(+), 1 deletion(-)
PS C:\27 October Git>
```

11) **git checkout master** – switched to master branch shows the rg added is not there

```
EXPLORER
  27 OCTOBER GIT
    main.tf 2
    providers.tf

main.tf > ...
1 resource "azurerm_resource_group" "rg1" {
2   name = "rg1"
3   location = "central india"
4 }
5
6 Ye badhiya tha guru

PROBLEMS 2 OUTPUT DEBUG CONSOLE TERMINAL PORTS

Switched to a new branch 'rakhisawant'
PS C:\27 October Git> git branch
ashishtest
gauravtest
master
* rakhisawant
PS C:\27 October Git> git add .
PS C:\27 October Git> git commit -m "rakhiadded"
[rakhisawant 903d2b4] rakhiadded
1 file changed, 6 insertions(+), 1 deletion(-)
PS C:\27 October Git> git branch
ashishtest
gauravtest
master
* rakhisawant
PS C:\27 October Git> git checkout master
Switched to branch 'master'
PS C:\27 October Git>
```

12) Now merging “**rakhisawant**” branch to “**master**” branch.

git checkout master

```
PS C:\27 October Git> git checkout master
Switched to branch 'master'
PS C:\27 October Git>
```

git log – shows we have 2 commits

```
PS C:\27 October Git> git log
commit 8b12ed8d5ad37d0dd3d9a97628a91f9ebacfd03e (HEAD -> master, gauravtest, ashishtest)
Author: Gauravrajsingh <er.gauravraj8052625814@gmail.com>
Date: Thu Oct 31 18:36:51 2024 +0530

    guru added

commit 78a9117b5bc1933d859403a219a3bcbddca2e2e6
Author: Gauravrajsingh <er.gauravraj8052625814@gmail.com>
Date: Thu Oct 31 18:31:16 2024 +0530

    added rg1
PS C:\27 October Git> █
```

git merge rakhisawant

```
PS C:\27 October Git> git merge rakhisawant
Updating 8b12ed8..903d2b4
Fast-forward
 main.tf | 7 +++++-
 1 file changed, 6 insertions(+), 1 deletion(-)
PS C:\27 October Git> █
```

13) So we can see code got merged in master branch also
